**COLORADO RENEWABLE ENERGY SOCIETY CELEBRATES EARTH DAY APRIL 22
WITH SCREENING OF SUNDANCE FESTIVAL AWARD-WINNER *CHASING ICE***

FILM EDITOR DAVIS COOMBE WILL ATTEND AND ANSWER QUESTIONS

DENVER, Colo., April 19, 2013—The [Colorado Renewable Energy Society](http://www.cres-energy.org) (CRES) today announced today that it will present the movie *Chasing Ice* on April 22, 2013, to celebrate Earth Day, which is also April 22. This film has won dozens of awards at film festivals, including Sundance and South by Southwest (SXSW). Michael O'Sullivan of the *Washington Post* wrote in a review, "This portrait of a man on a mission moves us, not by showing us what we've already lost, but what's still at stake."

About Chasing Ice

In the spring of 2005, acclaimed environmental photographer James Balog headed to the Arctic on a tricky assignment for *National Geographic*: to capture images to help tell the story of the Earth's changing climate. Even with a scientific upbringing, Balog had been a skeptic about climate change. But, that first trip north opened his eyes to the biggest story in human history and sparked a challenge within him that would put his career and his very well-being at risk. Director Jeff Orlowski spent months following Balog as he struggled with balky equipment, terrible weather, sideways terrain and personal injury to acquire time-lapse photography of moving glaciers. The time-lapse footage shows dramatic evidence of glacier retreat in Greenland, Iceland, Alaska and Montana.

About Davis Coombe

Davis Coombe has edited many acclaimed films including Academy Award winners on HBO and BRAVO. More recently, he is the editor for the award winning film *Chasing Ice*.
